Identify your business improvement opportunities in just 4 weeks

Why Supply Chain Diagnostic?

The diagnostic identify gaps, then prioritize short, medium and long term actions, empowering the personnel to achieve company's objectives

Closing the GAPS:

- Gaps identified have the effect of limiting cost savings, revenue enhancement, working capital reduction, and customer service improvements.
- APICS and SCOR Best practices identify how addressing key gaps can contribute to better performance.
- An action plan will be delivered to close gaps, improve performance and address opportunities.

Potential Benefits?

- Reduce Inventory levels (5 to 40%) and Increase inventory turns
- Increase customer service level
- Increase sales due to less stock outs and better customer service
- Reduce Supply Chain Costs
- Increase profit margins
- Others
